KHURSHED RAZZAK GADDI

Email: gaddi33khursheed@gmail.com | Phone: (+91) 998-711-9862 | LinkedIn | Github

PROFESSIONAL SUMMARY

Accomplished Backend Engineer with deep expertise in Python, Generative AI, and Agentic AI systems, specializing in building scalable, AI-driven solutions for enterprise use cases. Hands-on experience designing multi-agent workflows with LangChain and LangGraph, RAG pipelines, and graph/vector databases (Neo4j), delivered through FastAPI backends and ReactJS frontends on AWS and Azure. Currently building SmartQ at Miratech, an agentic platform for call-intent identification, intelligent routing, and automated test-case generation for contact-centre call flows. Skilled in leading teams, architecting robust systems, and integrating modern LLM providers (OpenAI, Anthropic, Bedrock, Mistral) to improve application performance. Committed to delivering innovative, high-quality software while staying at the forefront of technological advancements.

SKILLS

- **Backend Technologies**: Python (primary), Node.js, JavaScript, Dart, FastAPI, Flask, Express.js, NodeRED, REST APIs
- **Frontend & Mobile Development**: ReactJS, Flutter, HTML, CSS
- **AI & Machine Learning**: Generative AI, Agentic AI, Multi-Agent Orchestration, LangChain, LangGraph, LangSmith, MCP, Supervisor Workflows, RAG, Intent Classification, Prompt Engineering
- **LLM Providers**: OpenAI, Grok, Groq, Anthropic, Bedrock, Mistral, LLaMA
- **Tools**: VSCode, IntelliJ IDEA, Visual Studio, Android Studio, Cursor IDE
- **Databases**: PostgreSQL, MySQL, MongoDB, SQL Server, SQLite, Firebase, Hive, Chroma, VectorDB, Pinecone, Neo4j
- **Local Storage**: Hive, SQFlite, Redis
- **Design Patterns**: MVC, MVVM, Clean Architecture
- **Cloud & DevOps**: Docker, Kubernetes, AWS (Bedrock), Azure (Azure OpenAI), GCP, CI/CD
- **Version Control**: Git, GitLab, GitHub

WORK EXPERIENCE

1. Miratech - Senior Software Engineer

Pune | 04/2026 - Current

- **SmartQ - Agentic Call Routing & Test Automation Platform**

- Built **SmartQ**, an agentic platform that identifies caller intent and routes calls to the correct department, using Python, FastAPI, LangChain/LangGraph, ReactJS, AWS and Azure.
- Developed an **AI-assisted Flow Studio** where users upload Visio/draw.io call-flow files. The files are parsed into a structured flow that drives automated generation of functional and edge-case test cases.
- Integrated **Azure Speech-to-Text** to transcribe recorded test calls, enabling automated validation and root-cause analysis of call failures.
- Implemented reusable **call configuration templates** and application-wide **Line of Business (LOB) filtering**, so flows, test cases and results are consistent and scoped per business line.
- Built a **Smart Assistant** for LOB- and call-type-specific chat that performs actions such as managing Jira tickets through tool/MCP integrations.

2. e-Zest Digital Solutions - Senior Software Engineer

Pune | 10/2021 - 03/2026

- **Java 8 to Java 21 - (Legacy Code Migration)**
    - Migrating the Java 8 Maven project to Java 21 Maven using AI agents.
    - Team of agents analyzing, parsing, and ingesting project into Neo4j Graph DB.
    - Automated migration using Agents. (June 2025 - September 2025).
    - Tech Stacks: Python , FastAPI, ReactJS, Neo4j, Azure, Redis and GenAI.

- **Perl to Java Migration - (Legacy Code Migration)**
    - Parser to convert Perl legacy code into AST and store in Graph DB.
    - Read from Graph DB to build context for Agents.
    - Migrated legacy Perl code to Java. (August 2025 - March 2026).
    - Tech Stacks: Python , FastAPI, ReactJS, Neo4j Graph, Redis and GenAI.

- **JIMS Virtual Assistant**
    - RAG-based chatbot with document ingestion for conversational queries.
    - Escalates queries if no results are found in documents, based on user choice.
    - Integrated multi-language support and stored user history for 8 hours per user.
    - Tech Stacks: Python with FastAPI, Documentation, GenAI, ReactJS, Azure, PostgreSQL, Redis,

- **Code Parser**
    - Transforms source code into Abstract Syntax Trees (ASTs) for deeper analysis.
    - Supports Java, .NET, VB.NET, Delphi, XML, Perl, Ruby.

- Use cases: Code analysis, transformation, documentation, AI-driven insights.
- Extensible and adaptable for various parsing workflows.
- Tech Stacks: Python, Java, Neo4j, Technical Docs, and GenAI.

- **NL Chatbot for Analytics**

  - Frontend (ReactJS) and Backend (Python) development.
  - Created APIs with FastAPI and Flask.
  - Integrated Generative AI (LangChain) for NLP.
  - Enabled chatbot to query databases and documents directly.
  - Tech Stacks: Python, GenAI, ReactJS, PostgreSQL, FastAPI.

- **KAPS Framework**

  - Knowledge Assistant: Conversational AI over domain-specific knowledge bases.
  - Extractor: Data extraction with custom prompts.
  - Analytics: Dashboard generation with intelligent charts.
  - Multi-LLM Support: Integrations with OpenAI, Mistral, Bedrock, local LLMs.
  - Tech Stack: Python with FastAPI, ReactJS, Neo4j Graph Database.

- **CWT Debt Collection Tool**

  - Developed UI using ReactJS and API integrations with FastAPI in Python.
  - Processed Excel data and automated property calls and status updates.
  - Performed reconciliation and generated reports.
  - Email summarization, sending automated email.
  - Tech Stacks: Python, ReactJS, MongoDB, PostgreSQL, GenAI.

- **Acti-on AI**

  - Developed UI with ReactJS and backend with Node.js.
  - Kafka-driven event architecture with MongoDB integration.
  - Implemented role assignment and subscription to Kafka topics.
  - Built AI assistant for workflow creation.
  - Tech Stacks: Python, ReactJS, NodeJS, NodeRED, KAFKA and MongoDB.

3. Dataviv Technologies - SE Intern

Mumbai | 06/2021 - 09/2021

- **MyMarket**

  - Developed and managed mobile applications using Flutter framework.
  - Integrated APIs and conducted code refactoring for performance.
  - Guided developers in maintaining code standards and best practices.

- Contributed to backend API development using NodeJS.
- Maintained mobile & web applications with API integrations.
- Worked in Agile methodology with cross-functional teams.

EDUCATION

- B.E Computer Science - Theem College of Engineering
- | *September 2021*
- HSC - RMC College of Science and Commerce
  | *October 2017*

CERTIFICATIONS

- Flutter (Udemy) | September 2020
- Python (Udemy) | October 2019
- NodeJS (Udemy) | July 2021

ROLES AND RESPONSIBILITIES

- Software Development (Full-Stack)
- Managing team of L1 GenAI developers
- L1, L2 Interview Panelist
- Project Architecture Setup
- Agentic AI System Design & Cloud Deployment (AWS / Azure)
- Deployment and Maintenance

ACTIVITIES AND INTERESTS

- HackerRank (05/2019 - 2021): Earned 3-star ratings in Python and Problem Solving.
- CSI - Web Competition (07/2020): Secured 3rd position in CSI's Web Designing Competition.
- Neon Cricket Champion (03/2021): Won the Neon Cricket final at Theem College of Engineering.

LANGUAGES

- English (Proficient)
- Hindi (Native)
- Marathi (Basic)
